## ABOUT

---

Full Stack Developer with 3+ years of hands-on experience in SvelteKit, Node, React and Next. I focus every technical decision on delivering customer value and producing clean, easy-to-maintain code for fellow developers. Skilled at collaborating with cross-functional teams, delivering scalable solutions, and effectively communicating with stakeholders. Adept in modern front-end frameworks, backend architectures, and cloud services.

## SKILLS

---

**Programming Languages:** JavaScript, TypeScript, PHP, Elixir

**Frameworks & Libraries:** React, SvelteKit, Phoenix, Express, Fastify, Next

**Cloud & DevOps:** Firebase, GCP (Datastore, Cloud Storage, Pub/Sub), API Gateway, Docker, SonarQube, CI/CD Pipelines

**Databases & Caching:** MySQL, PostgreSQL, MongoDB

**Methodologies & Practices:** Scrumban, SOLID, Design Patterns, Unit & Integration Testing

**Other Tools:** WebSocket, Webhooks, Git, Cypress, Playwright

## EXPERIENCE

---

**Mid-level Backend Developer** | [Clinicorp Solutions](#) — Jaraguá do Sul (11/2025) – Present

- Build and maintain scalable microservices focused on Data Engineering (ETL), ensuring efficient ingestion and export of large data volumes across a distributed architecture.
- Develop APIs with Fastify and Express using Node.js and TypeScript, guaranteeing code consistency, performance, and maintainability across services.
- Manage application state and persistence using PostgreSQL, Datastore, and Cloud Storage (Buckets) on GCP, enabling reliable and cost-effective data handling at scale.
- Orchestrate service communication via Pub/Sub, implementing resilient and asynchronous messaging patterns to decouple and stabilize the microservices ecosystem.

**Junior Full Stack Developer** | [Victoware – Software Development Experts](#) — Joinville (Remote) (08/2023) – (10/2025)

- Implemented real-time analytics with Firebase Events, Cloud Functions, SvelteKit UI and a Node.js/TypeScript API on PostgreSQL, giving stakeholders instant product-usage insights and guiding data-driven roadmap decisions.
- Automated lifecycle and transactional emails through AWS SES + Terraform pipelines written in TypeScript, cutting manual support tasks and lifting user-engagement metrics across onboarding and payment flows.
- Shipped an MVP from scratch virtual gender-reveal gift registry, digital invitations and integrated Asaas payment API using SvelteKit, Express (Node.js) and REST APIs, moving the product from concept to production in under three months.
- Raised code reliability by adopting test-driven development with Vitest and Playwright, enforcing SOLID principles and peer reviews in Bitbucket; unit-test coverage exceeded 90% while post-release defects dropped sharply.

**Junior Full Stack Developer** | [Bom.capital](#) — Jaraguá do Sul (09/2021) – (12/2021)

- Maintained and enhanced a credit-loan platform for small businesses, shipping new functionality across a React front-end and Elixir/Phoenix services, improving application throughput and user satisfaction.
- Modernized UI/UX in partnership with design, delivering a cleaner aesthetic and more intuitive workflows that boosted user engagement on key loan-application pages using React.

## EDUCATION AND CERTIFICATIONS

---

**Unisociesc**, Santa Catarina, Jaraguá do Sul — Bachelor's Degree in Computer Science (*In Progress, Expected 2027*)

**Data Structures and Algorithms** • Alura (2025)

**PHP** • Alura (2024)

**PostgreSQL** • Alura (2023)

**Svelte: Directives and Components with TypeScript** • Alura (2023)

**English Exchange Program** • Toronto, Canada (2023)

**English Course** • CNA Jaraguá do Sul (2022)
